

KAL-GARD HOMECARE RHEOLOGY MODIFIERS

HOMEGARD rheology modifiers are specially designed for use in the personal care sector to provide the user the ability to adjust flow properties, stabilize and thicken formulations as well as help suspend particles. Our rheology modifiers are compatible with a wide range of personal care ingredients which will allow the formulator to find a product for every application.

PRODUCT OVERVIEW:

- KG 5029: Very efficient and can be used in a wide array of formulations
- KG 5017: Offers smooth and elastic rheology with excellent viscosity stability
- KG 5005: Thickens acid systems and is compatible with Anionic, Nonionic and Cationic surfactants
- KG 5032: Short, smooth flow, stable in high alkaline solutions and neutralizes to a clear gel
- KG 5002: Great anti redeposition properties, helps to reduce crystal growth and excellent hydrotrope for stubborn surfactants
